Law Section at UMT library – a valuable initiation

with the aim of supporting the great variety of subjects offered in the curriculum at UMT, the library has established an organized collection of law resources. It is a designated depository for law study that consists of both print and digital contents. It houses complete archives of Pakistani law reports SCMR, PLD, CLC, CLD, and MLD dating back to 1950s. The library also subscribes to the current issues of these serial publications. The number of e-books available is over 3000 whereas 250 law related e-journals are accessible with their fulltexts.

Pakistan LawSite – a one stop resource site for statutes, rules and cases relating to Pakistan is also a key part of this *law collection*. It is one of its kind and houses all the federal and provincial statutes and cases related to these statutes. Taxation, service, copyright, state planning, labour and all kinds of fiscal statutes are covered in this site. Moreover there are more than 1200 essays, writings, and other legal documents available there.

All contents are accessible to UMT community in general and to *School for Law and Policy* in particular. Placed at level 2 of the library this law collection is responsive to contemporary legal education for today's researchers. It is equally supported by our extensive interdisciplinary collections on general interest. Learners may suggest new resources and ways to enhance the portfolio of services for the betterment of the said section.

Universities sinking by Atta-ur-Rahman

Saturday, July 28, 2012

After a remarkable period of growth and progress during 2003-2008, the Higher Education Commission has been under constant attack and our universities are sinking. The tremendous progress made in Pakistan by the higher education sector in the six-year period between 2003 - 2008 is illustrated by the reviews of the higher education system carried out by European experts as well as experts appointed by USAID on higher education. A review of the higher education system of Pakistan was carried out by Prof Michael Rode, chairman of the United Nations Commission on Science, Technology and Development, and professor at the University of Innsbruck in Austria who visited Pakistan on a number of occasions. He wrote in 2008:

“Around the world when we discuss the status of higher education in different countries, there is unanimity of opinion that the developing country that has made the most rapid progress internationally in recent years is Pakistan. In no other country has the higher education sector seen such spectacular positive developments as that in Pakistan during the last six years. This became possible for three main reasons: 1. The closure of the University Grants Commission (UGC) and the establishment of an autonomous ministerial-level organization operating under the direct control of the prime minister of Pakistan, free from the bureaucratic procedures of the ministry of education. 2. The establishment of a highly competent and representative 18-member commission comprising secretaries of the ministries of education and science and technology, eminent educationists, vice-chancellors of universities and representatives of all provinces. 3. Appointment of Pakistan’s leading scientist and educationist Prof Dr Atta-ur-Rahman as the chairman of the Higher Education Commission with the status of a federal minister to provide competent and dynamic leadership to the commission.

“As a result a miracle happened. University enrolment of only 135,000 by the end of the year 2002 was almost tripled in a short period of five years by 2007 and reached 360,000. Research output in internationally recognized and reviewed journals (abstracted by the Institute of Scientific Information, USA) showed a 400 percent increase, rising from about 600 publications per year in 2002 to over 2,400 publications per year in 2007 (note: this has now risen to 6250 by 2011).

“After the formation of the Higher Education Commission, a silent revolution occurred and probably the best digital library in the world was set up in Pakistan which today provides free access to every student in every public-sector university in Pakistan to some 25,000 international journals and 45,000 textbooks and research monographs from 220 international publishers, keyword searchable and downloadable, completely free of charge.

Such a nationwide access to the latest literature is not even available in Europe or the USA today, and Pakistan demonstrated that given honest, dedicated and dynamic leadership as provided by Prof Dr Atta-ur-Rahman and his eminent colleagues led by Dr Sohail Naqvi, it was possible to achieve the almost impossible. Most universities in Pakistan are today equipped with video-conferencing facilities and lectures are delivered regularly by professors from top universities in Europe, the USA, etc., and listened to by students in Sindh, Balochistan and other provinces in real-time and in a fully interactive manner, so that face-to-face questions can be asked across the world. Pakistan has become the first in the world to introduce a nationwide international lecturing programme.”

The USAID team of educationists visited Pakistan a number of times and travelled the length and breadth of the country, talking to teachers, students and administrators in the universities and examining the data critically. I reproduce here some sections of the USAID report published in 2008 that resulted from the year-long review:

“One of the most striking aspects of the HEC since its inception is the emphasis on excellence and high quality in every sphere of its activities. Expectations were set high from the outset. Quality goal targets were set as international standards and expectations. Faculty promotions, publications, PhD dissertations, research grants, and many of the HEC programmes were subject to these standards, including evaluation by external peer reviewers. In addition, standards for admission to PhD programmes were increased in 2003. This was in spite of the need for more graduates to teach the growing number of students. In keeping with its focus on quality, the attitude of the leadership of the HEC was that ‘quality is much more important than quantity.’

“What was striking about the HEC was that in spite of the breadth and magnitude of its programs and the extensive changes involved, implementation of all these programs was undertaken with great care to ensure quality improvement. In spite of rapidly increasing budgets, the HEC managed to keep the focus on quality improvement with the goal of meeting international standards in higher education.”

The above reviews by leading US and European experts after yearlong assessments prove without a shade of doubt that some critics of HEC policies were completely wrong and biased in their criticisms.

This period of spectacular progress was, alas, short-lived. Very soon after coming into power the new government slashed the budget of the HEC by about 50 percent, thereby stopping most university development projects. It led to the stoppage of the scholarships of the several thousand students, mostly from poor families, who were studying for PhD in top universities in Europe, and they were forced to beg for funds in mosques and on the streets of European cities. This forced me to resign in protest as chairman of the HEC although I had another two years before the expiry of my tenure. The visionary scheme to establish nine foreign engineering universities in Pakistan was abandoned by the government three months before classes were to commence.

The scheme to establish four law universities that were to be established in the four provinces, with 40 PhDs in law as faculty members in each university, was also shelved as the law minister in his infinite wisdom stated in the cabinet meeting that we had enough law colleges, so law universities with qualified faculties were not needed. All this was done because the HEC had discovered that 51 of our “honourable” parliamentarians had bogus degrees and those of another 250 parliamentarians were suspect as they had refused to provide the documents for verification. Not to be satisfied, and nudged on by these crooked parliamentarians, the government issued a notification on March 31, 2011, shredding the HEC into pieces. I appealed to the Supreme Court against the government notification and the Supreme Court upheld my appeal, declaring the government notification unconstitutional. So the HEC survived.

However, the enmity against the HEC continues. In a more recent notification, No. 4-1/2012 Ref: Min-1, dated June 8, 2012, the government of Pakistan (Cabinet Secretariat, Cabinet Division) has recently placed the Higher Education Commission under the Professional and Training Division. This was done in defiance of the Supreme Court decision that forbade the government from taking any decision that was in violation of the HEC Ordinance. It was also done although the controlling authority of the HEC is directly the prime minister of Pakistan and not any federal ministry. Fortunately, action on this notification has been suspended by the Sindh High Court.

Our universities today are sinking rapidly due to budgetary cuts and political meddling. One sector that had shown dramatic improvements is being destroyed by the enemies of Pakistan.

Will the president and prime minister intervene to assist the sinking HEC?

The writer is former chairman of the Higher Education Commission and former federal minister of science and technology. Email: ibne_sina@hotmail.com

Bloomberg Businessweek
Contents

July 2 – July 8, 2012
Bloomberg Businessweek

Open me!
How to write a compelling
e-mail subject line p69

Opening Remarks 4

State-capitalist systems such as China are shattering the idea they can't foster innovation

Bloomberg View Wanted: Mario Monti, politician; The Supreme Court gets it right on Arizona p6

Global Economics 8

The doom loop
The toxic ties between banks and governments have left Europe in dire need of radical solutions

The owner of the Brooklyn Nets aims to be Moscow's mayor p10
High earners take a break from shopping p11
China's steel obsession p12
The week ahead p13

Companies & Industries 14

Cutting retirees loose
GM and Ford try to tame their costs by buying out retirees' pensions. The ex-workers are worried

The Rx for China's hospitals: Foreign investors p15
A cranberry industry caucus to sweeten up Congress p17
DoCoMo's senior strategy p18
Briefs: News Corp.'s divorce p19

Politics & Policy 20

The farm bill and you
How the half-trillion-dollar legislation touches every moment of your day

The making of a 1,000-page law: Corn, corn syrup, and corn flakes p21
The 21st century family farm p23
Charlie Rose talks to Marco Rubio p26

Technology 28

A plague of QR codes
The black-and-white boxes are everywhere—and consumers often ignore them

Lightning's casualties: home electronics p29
Enterprise technology gets almost sexy p30
Sprint woos data hogs p31
Innovator: Wi-Fi roaches p34

Markets & Finance 37

Mary Schapiro's crusade
The SEC chairman says new rules are needed to avert runs on money funds. The industry disagrees

Investors remain wary after Egypt's elections p38
Where bankers are loved p39
Arizona's latest housing crisis is a labor shortage p41
Bid & Ask: A rare Lincoln p42

Features 44

John Paulson's Very Bad Year
Nothing could go wrong for the hedge fund manager—until everything did. Inside the unmaking of a Wall Street legend p44

The Mayor, the Governor, and the Billionaire
In 2010, Mark Zuckerberg pledged \$100 million to save Newark's schools. That's not easy to do, even with the political muscle of Cory Booker and Chris Christie p50

The Talented M. Despalhières
He says he's an Internet entrepreneur whose wealthy spouse died of natural causes. His accusers say he's a con man and a murderer p56

Etc. 63

Standing Room Only
Sitting all day can kill you, doctors say. So workers are turning to standing, sit-stand, and treadmill desks

Behavior How customers react to nail-salon pampering says a lot about them p66
The One... The Score + Solder geodesic terrarium can provide a Zen-like diversion in the workplace p68
Inbox To ensure your e-mails are read, follow these tips on filling the subject line p69
The Tube HBO's *The Newsroom* has the hallmarks of many of Aaron Sorkin's best works. It's also a mess p70
Hard Choices Spike Lee on self-financing his latest film, *Red Hook Summer* p72

Mohamed Mursi
Can he govern? p38

Contents

July 9 — July 15, 2012
Bloomberg Businessweek

Guitar Hero
A tech millionaire rediscovers his first love p69

Opening Remarks

The Chief Justice's ruling on Obamacare reflects the thinking of a chief executive

Bloomberg View The Barclays scandal shows there's still something rotten about banking p8

Global Harvest Deere's sales are brisk in markets like South America p44

Global Economics

The price of too big to fail
Academics say big banks saved \$120 billion in lower financing costs thanks to government backing

A slow train for coal exports p12
Germany's case of euro flu p13
U.S. drought, global crisis? p14
The desk rental indicator p15
Tom Keene's EconoChat p16
The week ahead p16

Companies & Industries

P&G ties up in Vietnam
With U.S. demand lagging, the personal-care giant looks to a booming market filled with young shoppers

The Olympic goals of NBC Sports Network p20
Porsche tries to retain its sports car cred p22
Briefs: GlaxoSmithKline p23

Features

Planet Deere
The Illinois icon is helping the world's farms meet soaring demand for food with its highly customizable tractors—and reaping the rewards of its very own export boom p44

Connecticut's Ribbon of Hardship
In the most unequal region in the country, the Lazarus family is trying to get on the ladder of upward mobility. It's a steep climb p50

Myanmar Opens Up
Chaos, opportunity—and no cell service anywhere. Inside the soon-to-be-booming Asian market p56

Politics & Policy

The case for mandates
They may not be popular, but without them people who avoid insurance get a free ride

To fund your MBA, borrow from alums p26
How real is reshoring? p27
Policing Obamacare p28
Attack ads in Colorado p28

Etc.

The Sweet Taste of Victory
For creators of artisanal delights, a sofi award is akin to an Oscar—and the food industry is taking note

Office Envy What is part Bond-villain lair, part Space Age greenhouse? The subterranean headquarters of Swedish broadband company Banhof p66
Billionaires Brazil's richest man tweets his hair implant to 1 million followers p68
Next Life David Kalk sold his billion-dollar tech company to run the legendary Chicago Music Exchange—and sell guitars to the likes of Johnny Depp p69
True Crime An excerpt from *Octopus*, Gary Lawson's new book about Bayou Hedge Fund's massive deceit, shows how easily the accountant cooked the books p70
Hard Choices Spurned twice, USA Network's Ray Koplovitz gets a cable deal p72

Technology

Hardware is hot again
Software gurus have rediscovered nuts and bolts—and are making some products in the U.S.

Big brands move into mobile ads p33
Shazam's second-screen strategy p34
Nintendo vs. Apple p35
Innovation: Into the woods p36

Markets & Finance

First, Barclays. Next ...
A global probe of interest rate manipulation gives a glimpse of what the scandal may cost banks

Drills for a euro collapse p40
The surprise beneficiaries of Mumbai's real estate boom p41
In mutual funds, a tortoise beats a hare p42
Bid & Ask: Bud gets a mate p43

Out

Barclays's Diamond p39

Let the Games Begin
From office soccer champs
to NBA legends p61

25 JUL 2012
July 16 -- July 22, 2012
Bloomberg Businessweek

Opening Remarks 4

World centers like London don't need the Olympics. Better to let striving cities host them

Bloomberg View How to slow the flow of hot money; Don't knock outsourcing p6

A new deal Friends say Groupon's CEO jokes a little less these days p48

Global Economics 9

Redefining Pemex
Mexico's president-elect wants to open up the state-owned oil company to outside investors

Capital flees Afghanistan p10
Denmark uses negative interest rates to keep investors out p11
China seeks better data p12
Colombian rebels mine gold p13
The week ahead p14

Companies & Industries 17

Nordstrom gets edgy
The upscale retailer is teaming up with Britain's Topshop to woo more fashion-conscious women

China limits cars p18
Sony's Spidey inhabits a world without Apple p19
Trojan wars: Durex takes on the leading U.S. condom maker p20
Briefs: Detroit offers deals p21

Oil Change
Mexico's Peña-Nieto p8

Politics & Policy 22

You're cordially excluded
What are Barack Obama and Mitt Romney telling rich donors that the rest of us aren't allowed to hear?

The Supreme Court's contentious year ahead p24
A fight over sterilization p25
Congress's Russia problem p25
Obama's relentless critic on the left p26

Technology 28

Building a better battery
The story behind GE's Durathon shows the potential—and pitfalls—of battery research

Preparing for a BlackBerry apocalypse p30
Stickers that make your smartphone smarter p31
Innovator: ZeroCater, the startup that feeds startups p32

Markets & Finance 34

Lehman lives!
The storied firm has emerged from bankruptcy aiming to raise at least \$53 billion to pay claims

JPMorgan's rescuer p35
A Sudanese standoff p36
Wall Street workers' bad 401(k) bet p38
Bargain BRICs p38
Bid & Ask: WellPoint p39

Features 40

God's Work
Mormon theology supports the megamalls, Polynesian theme park, and media and insurance empire that further the aims of the church—and help it make billions p40

Groupon Tries to 'Get Good' at Growing Up
Known for his goofball antics, CEO Andrew Mason tries for a second act as competition intensifies and the company's stock stays in the toilet p48

Not in My Organic Vineyard
Wineries and organic farms quilt the hillsides of Colorado's North Fork Valley. Will fracking make an inroad, too? p54

Etc. ★ OLYMPIC SPECIAL ★ 61

Going for Office Gold
Desk-chair soccer and trashcan basketball are among the workplace games this Olympic season

The Grid Surface-to-air missiles on top of your flat? What Londoners are putting up with—more or less—to host the 2012 Games p64
Perks Just how much are those bronze, silver, and gold medals worth? (Shhh, don't tell the athletes—that's not pure gold.) p66
Competition From a blind archer to a female Afghan boxer, subplots to follow p68
Sport Will Ann Romney's dressage horse despoil her husband's campaign trail? p70
Hard Choices How Duke's Coach K builds teamwork among Team USA superstars p72

CORRECTIONS AND CLARIFICATIONS

In "The Best Places to Retire Now" (July 2), we incorrectly referred to Cuenca, Ecuador, as a coastal city. It is in the Andes. And in "Bet on the Brands" (July 2), we wrote that Nestlé's brands include Cheerios and Häagen-Dazs ice cream. In fact, Nestlé sells Cheerios outside the U.S. as part of a joint venture with General Mills, but General Mills owns the brand. In the case of Häagen-Dazs, Nestlé sells the ice cream in the U.S. and Canada but licenses the brand from General Mills.

Comments

- Why Iran Should Get the Bomb** *Kenneth N. Waltz* 2
U.S. and Israeli officials have declared that a nuclear-armed Iran is a uniquely terrifying prospect, even an existential threat. In fact, it is the best possible outcome of the West's current standoff with the Islamic Republic. By creating a more durable balance of military power in the Middle East, a nuclear Iran would yield more stability, not less.
- Europe's Optional Catastrophe** *Sebastian Mallaby* 6
If the eurozone splinters, it will have been an avoidable disaster. After all, the European Central Bank has already gone to great lengths to shore up the continent's financial system. Now, the choice lies with Germany, which can save the monetary union if it allows for policies aimed at debt relief and growth, not just slashing deficits.
- The Cuban Missile Crisis at 50** *Graham Allison* 11
Fifty years ago, the Cuban missile crisis brought the world to the brink of nuclear disaster. Every president since John F. Kennedy has tried to learn from what happened back then. Today, it can help U.S. policymakers understand what to do—and what not to do—about Iran, North Korea, China, and presidential decision-making in general.
- Trading Up in Asia** *Bernard K. Gordon* 17
The Trans-Pacific Partnership, a massive multilateral trade agreement now in the works that focuses on the Asia-Pacific region, could add billions of dollars to the U.S. economy and solidify Washington's commitment to the Pacific. But if the Obama administration fails to calm critics of the deal, there is a growing possibility that it could collapse.

Essays

Environmental Alarmism, Then and Now *Bjørn Lomborg* 24

Forty years ago, the Club of Rome produced a best-selling report warning humanity that its escalating wants were on a collision course with the world's finite resources and that the only way to avoid a crash was to stop chasing economic growth. The predictions proved spectacularly wrong. But the environmental alarmism they engendered persists, making it harder for policymakers to respond rationally to real problems today.

The Right Way Out of Afghanistan
Stephen Hadley and John Podesta 41

As the United States prepares to exit Afghanistan, it is focusing too much on security, overlooking the political elements of the transition, write two former senior U.S. officials. To leave behind a stable government in 2014, Washington needs to push harder for electoral reforms, negotiations with the Taliban, and a regional settlement involving Pakistan.

Obama's New Global Posture
Michèle Flournoy and Janine Davidson 54

Tough economic times are often met in Washington with calls for retrenchment. But for decades, write two former top Pentagon officials, long-term forward deployments of U.S. forces and robust alliances have guaranteed stability and uninterrupted trade, the very conditions the United States needs for economic prosperity. The Obama administration gets it.

How India Stumbled *Pratap Bhanu Mehta* 64

Just a few years ago, India seemed on the brink of becoming the world's next great power. Today, its future appears less certain. Although some have blamed the global economic recession, the real problem is domestic—namely, the centralized, secretive, and arbitrary political culture that pervades New Delhi.

Deterrence Lessons From Iraq *Amatzia Baram* 76

Debates about the possibility of containing a nuclear Iran often hinge on judgments of whether the regime there is rational. But as a wealth of recently released Iraqi documents about Saddam Hussein's tumultuous reign in Iraq show, even an arguably rational leader can be unreasonable—and very hard to deter.

How to Succeed in Business *Alexander Benard* 91

Unlike other economic powerhouses, the United States does little to help its own companies win business abroad, and that timidity has allowed China to devour market share in emerging economies. It is time for Washington to shed its hang-ups about lobbying on behalf of American firms and start taking commercial diplomacy seriously.

FOREIGN AFFAIRS · July/August 2012

Contents

Cleaning Up Coal *Richard K. Morse* 102

Coal combustion is the largest source of carbon dioxide emissions on the planet. But the fuel isn't going away anytime soon, since demand for it is ballooning in the developing world. So instead of indulging in quixotic visions of a coal-free world, policymakers should focus on supporting new technologies that can reduce how much carbon coal emits.

Reviews & Responses

Hegemony and After *Robert O. Keohane* 114

Yet another bout of worry about long-term U.S. decline has generated yet another countersurge of defensive optimism. What new books by Robert Kagan and Robert Lieber miss, however, is the critical role played by multilateral institutions in the perpetuation of the United States' global leadership.

Fixing Finance *Gillian Tett* 119

As the global financial sector has swelled, the gap between the rich and the poor has grown. Three new books—by James Galbraith, Robert Shiller, and Charles Ferguson—come down differently on how much banks are to blame for inequality and what the government should do about it. Pushing for more accountability would be a good place to start.

Reading Putin *Joshua Yaffa* 126

With Vladimir Putin back in power in Russia, understanding him is more important than ever. Two recent books attempt to unravel the mystery, adding new insight into the Russian leader's life and rule. But by trying to comprehend Putin through his personal history, they miss the true heart of the story: the state he built.

Confucius and the Ballot Box *Andrew J. Nathan* 134

Is culture to blame for the fact that only six of the 16 countries of East and Southeast Asia are functioning democracies? No, argues a new book, which aims to settle the long-running debate over democracy and "Asian values" by separating myths from facts and assumptions from evidence.

Robespierre's Rules for Radicals *Patrice Higonnet* 140

Democratic revolutionaries always confront the same problem: how to replace the old order without replicating its flaws. The French revolutionary Maximilien Robespierre's failure to resolve that dilemma led to his own demise on the guillotine. But a new biography reveals that today's radicals might learn from Robespierre's mistakes.

Contents

National Insecurity

Paul D. Miller; Micah Zenko and Michael A. Cohen 146

Given the threats it faces, from nuclear-armed autocracies to terrorists, the United States cannot afford to scale back its military, argues Paul Miller. Micah Zenko and Michael Cohen reply that the danger of these challenges is vastly exaggerated and that an overly militarized foreign policy has not made the country safer.

Is Iraq on Track? *Antony Blinken; Norman Ricklefs; Ned Parker* 152

Iraq is hardly the failed state that Ned Parker portrayed in these pages, argues Antony Blinken, the U.S. vice president's national security adviser. Norman Ricklefs sees Iraq's politics becoming more moderate and less sectarian. Parker replies that despite these improvements, Baghdad still violates human rights and ignores the rule of law.

How Busted Is Brazil? *Shannon O'Neil; Richard Lapper; Larry Rohter; Ronaldo Lemos; Ruchir Sharma* 159

Brazil's rise never depended on the sale of commodities, and thanks to recent reforms, the country will continue to prosper, write Shannon O'Neil, Richard Lapper, and Larry Rohter. Ronaldo Lemos, meanwhile, claims that those reforms have not gone far enough. Ruchir Sharma responds that Brazil is indeed headed for trouble.

Measuring the Mafia-State Menace *Peter Andreas; Moisés Naím* 167

The link between crime and the state is neither as new nor as scary as Moisés Naím depicted it, argues Peter Andreas; after all, criminals have been corrupting governments for centuries. Naím responds that mafia states are unprecedented and worrisome.

Letters to the Editor 172

Including Jud Nirenberg on animal welfare, S. J. Deitchman on the Vietnam War, and Jamie Jones on the new space race.

The articles in Foreign Affairs do not represent any consensus of beliefs. We do not expect that readers will sympathize with all the sentiments they find here, for some of our writers will flatly disagree with others, but we hold that while keeping clear of mere vagaries, Foreign Affairs can do more to inform American public opinion by a broad hospitality to divergent ideas than it can by identifying itself with one school. We do not accept responsibility for the views expressed in any article, signed or unsigned, that appears in these pages. What we do accept is the responsibility for giving them a chance to appear.

Cover Story
Computing in the Cloud 30
Cloud computing demystified

Rapid Progress 32
The team from RapidCompute – a division of Cybernet – talks about how cloud computing is going to revolutionise IT in Pakistan

Cloud Choices 35
A practical guide to cloud computing

Making the Cut 38
Short reviews of the leading cloud service providers in the world

Myths vs. Reality 41
Uncovering the hazy truths of cloud computing

Ed's note 15
From the Editor's desktop

Newsbytes 19
Newsworthy stories and happenings from around the world

Your Say 25
Criticism, appreciation and suggestions from our readers

Virtual Nicotine? 43
When addiction kicks in and games stop being just harmless fun

Flame Ignites Cyber Espionage 46
The malware that shook the Middle East's information security structure

The Changing Face of Mass Media 48
The transition from traditional TV to digital entertainment

Phonephiles 50

Phonephiles: The X Factor 50
HTC One X turns out to be a great phone with few flaws

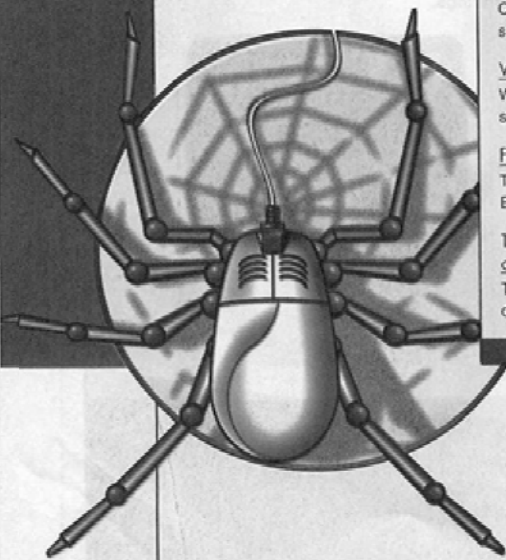

Game Hub 55

Max Payne 3 55
Survival instincts bring out the darkness in Max Payne

Sonic the Hedgehog 4: Episode 2 57
The old Sonic in a new garb

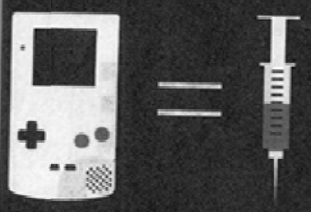

Gravity Rush 58
Time to enter a world where gravity can be defied

Parasite Eve 59
A flashback a world full of action and horror with Aya Brea

11 JUL 2012

Virtual Nicotine? **43**

@play 61
Games slated for release this month

Electronic Entertainment 62
An overview of the upcoming games from Microsoft, Sony, Nintendo, and others

Buyer's Guide 66
A price-oriented overview of webcams, headsets and speakers

Changing Paradigms 68
Self e-publishing and the future of books

Solid Storage 72
From HDDs to SSDs

How To 74
Some useful tech tips and tricks

Creative Cells 76
An interview with Munir Usman, the CEO of Pi Labs

Netropolis 79
Your monthly dose of entertaining websites

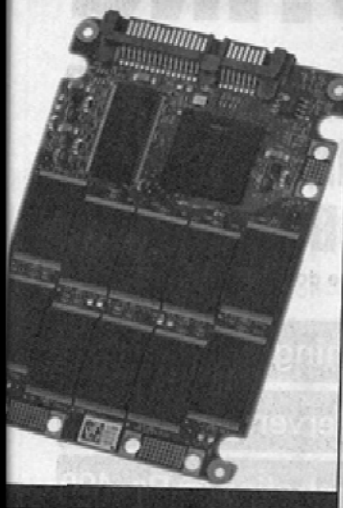

Technology for Humanity 82
How technology has made transactions easier and quicker than ever

ISP Index 87
A list of Wi-Fi hotspots and ISPs for consumer broadband internet

Game Hub **55**
