

University of Management and Technology

Course Outline

Course code: ET 104

Course title: Electrical Fundamentals

Program	BSc Aircraft Maintenance Engineering Technology	
Credit Hours	03+01	
Duration	15 weeks	
Prerequisites	Nil	
Resource Person	Fatima Najeeb Khan	
Counseling Timing (Room#)	Tuesday	14:00 to 17:00
	Thursday	14:00 to 17:00
	Friday	14:00 to 17:00
Contact	fatima.najeeb@umt.edu.pk

Learning Objective:

This course aims to develop a comprehensive understanding of the electrical systems, circuits and components. It will serve as a basic introduction to the concepts related to electrical systems. The course will also cover a detailed discussion on DC and AC circuit analysis

Upon successful completion of the course, the student should be able to:

S No	CLO Statement	PLO	Learning Domain and level
1.	Demonstrate an understanding of the electrical systems, components and circuits	1	C2
2.	Be able to describe and outline the working of electrical components. (Motors, Generators etc.)	2	C4
3.	Practically Implement the theoretical knowledge gained and produce valid results	5	P3
4.	Conduct and Interpret the results of experiments and demonstrations of electrical components.	3	P3
5.	Effectively communicate experiment results through both written reports and oral Presentations	10	P3

1. CLO – PLO MAPPING:

CLOs	PLOs											
	Engineering Knowledge	Problem Analysis	Design / Development of Solutions	Investigation	Modern Tool Usage	The Engineering Technologist and Society	Environment and Sustainability	Ethics	Individual and Team Work	Communication	Project Management	Lifelong Learning
	1	2	3	4	5	6	7	8	9	10	11	12
1	C2											
2		C4										
3					P3							
4			P3									
5										P3		

Learning Methodology:

- The teaching of the course will be via a series of lectures. This will be complemented by the use of textbook, and an extensive range of web resources plus handouts/articles and video clips.
- Participants should expect 5-6 class activities during the semester which will form the basis for evaluation (viva). 2 assignments, individual/group presentations and quizzes. These activities will be complemented with discussions and analysis to strengthen the learning.

Recommended Text Books:

1. “Electrical Fundamentals” by AERO-Bildung (2nd Edition) Germany [2016]

Reference Books:

1. “Fundamentals of Electric Circuits” by Charles K. Alexander and Matthew N. O. Sadiku published by McGraw-Hill.
2. “Electrical Fundamentals”-Aviation Maintenance Technician Certification Series by Aircraft Technical Book Company

Grade Evaluation Criteria

Following is the criteria for the distribution of marks to evaluate final grade in a semester.

Marks Evaluation

Marks in percentage

Theory:

Marks Evaluation	Marks in percentage
Quizzes (x6)	15%
Assignments (x2)	10%
Evaluation(Viva)	5%
Presentation	5%
Mid Term Examination	25%
End Term Examination	40%
Total	100 %

Practical:

Marks Evaluation	Marks Percentage
Class activity	5%
Team work	5%
Quizzes	15%
Viva	5%
Lab Report	10%
Final Evaluation	60%
Total	100%

Calendar of Course contents to be covered during semester

Course code: ET 104

Course title: Electrical Fundamentals

Week	Course Contents	Reference Chapter(s)	Quiz	Assignments	CLOs
1	Electron Theory Static Electricity	1,2	1		1
2	Electrical Terminology Generation of Electricity	3,4			
4	DC Sources	5	1		1,2
5	DC Circuits Resistors	6,7	1		1,2

6	Electrical Power Capacitors and Capacitance	8,9		1	2
7	Magnetism Induction/Inductor	10 11			
8	Mid Term Examination				
9-10	Direct Current Generators/ Motors Alternating Current	12 13	1	1	1,2
11	Resistive (R), Capacitive (C) and Inductive (L) Circuits	14	1		1,2
12-13	Transformers	15			
14	Filters	16	1		1

15	AC Generators AC Motors	17 18	1	1	1
----	----------------------------	----------	---	---	---

Electrical Fundamentals Lab Outline

Serial No.	Description	CLO
1.	Safety Precautions and Basic Tools of Electric Shop	4,5
2.	Introduction to Cables and Earthing	
3.	Implementation of Series and Parallel DC Circuits	
4.	Ohm's Law and Familiarization with the Lab Instruments	
5.	Simulation and Implementation of Superposition and Maximum Power Transfer Theorem	
6.	Investigation of the voltage regulation of a single phase transformer	
7.	Implementation of Series and Parallel RL circuits	
8.	Implementation of Series and Parallel RC circuits	
9.	Implementation of RLC series and Parallel Circuits	
10.	To investigate the Voltage Regulation of Three Phase Transformer	
11.	Band Pass Filters And Band Stop Filters	
12.	Simulation and Implementation of Δ -Y conversion	

13.	Current And Voltages In Balanced Three Phase System	
14.	To investigate the Characteristics of DC Compound Motor	
15.	To study the Characteristics of Universal Motor	

Class Policy

STUDENTS ARE REQUIRED TO READ AND UNDERSTAND ALL ITEMS OUTLINED IN THE PARTICIPANT HANDBOOK

CLASS ATTENDANCE: Students need to be in class at the assigned time. After 10 minutes past the assigned time, the students will be marked absent.

TURN OFF MOBILE PHONE! It is unprofessional to be texting or otherwise.

READ EMAILS! Participants should regularly check their university emails accounts regularly and respond accordingly. Students would be responsible if they miss a deadline because of not reading the emails.

CLASS ATTENDANCE POLICY: A minimum of 80% attendance is required for a participant to be eligible to sit in the final examination. Being sick and going to weddings is absence and will not be counted as present. Participants with less than 80% of attendance in a course will not be allowed to take end term exams. International students who will be leaving for visa during semester should not use any days off except for visa trip to avoid reaching short attendance.

MOODLE: UMT –LMS (Moodle) is an Open Source Course Management System (CMS), also known as a learning Management System (LMS). Participants should regularly visit the course website on MOODLE Course Management system, and fully benefit from its capabilities. In case of any problem while using MOODLE, visit <http://oit.umt.edu.pk/moodle>. For queries email moodle@umt.edu.pk

HARASSMENT POLICY: Sexual or any other harassment is prohibited and is constituted as punishable offence. Sexual or any other harassment of any participant will not be tolerated. All actions categorized as sexual or any other harassment when done physically or verbally would also be considered as sexual harassment when done using electronic media such as computers, mobiles, internet, emails etc.

USE OF UNFAIR MEANS/ HONESTY POLICY: Any participant found using unfair means or assisting another participant during a class test/quiz, assignments or examination would be liable to disciplinary action.

PLAGIARISM POLICY: All students are required to attach a “Turnitin” report on every assignment, big or small. Any student who attempts to bypass “Turnitin” will receive “F” grade which will count towards the CGPA. The participants submit the plagiarism report to the resource person with every assignment, report, project, thesis etc. If student attempts to cheat Turnitin, a second “F” will be awarded that will count towards the CGPA. There are special rules on plagiarism for final reports etc. all outlined in your handbook.

COURSE WITHDRAWAL POLICY: Students may withdraw from a course till the end of the 12th week of the semester. Consequently, grade ‘W’ will be awarded to the student which shall have no impact on the

calculation of the GPA of the student. A Student withdrawing after the 12th week shall be automatically awarded "F" grade which shall count in the GPA.

COMMUNICATION OF RESULTS: The results of quizzes and assignments are communicated to the participants during the semester and answer books are returned. It is the responsibility of the course instructor to keep the participants informed about his/her progress during the semester. The course instructor will inform a participant at least one week before the final examination related to his or her performance in the course.
