Answer the questions.**

PASSAGE 1

It is difficult to reconcile the ideas of different schools of thought on the question of education. Some people maintain that pupils at school should concentrate on a narrow range of subjects which will benefit them directly in their subsequent careers. Others contend that they should study a wide range of subjects so that they have not only the specialized knowledge necessary for their chosen career but also sound general knowledge about the world they have to work and live in. Supporters of the first theory state that the greatest contributions to civilization are made by those who are most expert in their trade or profession. Those on the other side say that, unless they have a broad general education, the experts will be too narrow in their outlook to have sympathy with their fellows or a proper sense of responsibility towards humanity as a whole.

Multiple Choice Questions (MCQs)

62. 'Schools of thought' can be explained as:

- A. Group of people who study in a particular school thoughtfully.
- B. Group of people having the same ideas but with different perception on a particular subject
- C. Group of people whose job is to think
- D. Group of people who are schooled to think

63. Broad general knowledge is necessary because:

- A. It teaches us about different things
- B. It broadens one's outlook
- C. Specialization is incomplete without it
- D. Without it no one would get a job

64. The idea of the first school of thought in the passage is that:

- A. Students should study all the subjects they want to
- B. Students should study a few subjects that will help them in their profession
- C. Students should concentrate on studies
- D. Students should not undertake any specialized work

65. Supporters of the first theory say that:

- A. Experts have done nothing to help mankind
- B. People with general knowledge are more useful than experts
- C. Experts have contributed most to progress in the modern world
- D. People with general knowledge have contributed to civilization

66. According to the second school of thought, education will not be very effective if pupils:

- A. Ignore the study of fine arts
- B. Have nothing but general knowledge
- C. Have inadequate knowledge of their own work
- D. Do not have a wide general education

PASSAGE 2

It is to progress in the human sciences that we must look to undo the evils which have resulted from knowledge of the changes in themselves that the new knowledge has made imperative. The road to the happier world than any known in the past lies upon before us if atavistic destructive passions can be kept in leash while the necessary adaptations are made. Fears are inevitable in our time, but hopes are equally rational and far more likely to bear good fruit. We must learn to think rather less of the dangers to be avoided than of the good that will lie within our grasp if we can believe in it and let it dominate our thoughts. Science, whatever unpleasant consequences it may have by the way, is in its very nature a liberator, a liberator of bondage to physical nature and in to come, a liberator from the weight of destructive passions. We are on the threshold of utter disaster or unprecedentedly glorious achievement. No previous age has been fraught with problems so momentous; and it is to science that we must look to for a happy future.

Multiple Choice Questions (MCQs)

67. What does science liberate us from? It liberates us from:

- A. Idealistic hopes of a glorious future

- A. The future will be brighter than the present
- B. The future will be tolerant
- C. The present will be brighter than the future
- D. The present will become tolerant

70. Fears and hopes, according to the author:

- A. Are irrational
- B. Are closely linked with the life of modern man
- C. Can yield good results
- D. Can bear fruit

71. Should human sciences developed because they will:

- A. Make us conscious of the changing world
- B. Provide more knowledge of the physical world
- C. Eliminate the destruction caused by a superficial knowledge of the physical world
- D. Make us conscious of the changes in ourselves
